

Reduce the Risk of Outbreaks

Disinfect Home or Work

We have several specialized disinfection services to treat surfaces for active viruses and bacteria, including the latest threat, **Coronavirus (COVID-19)**. Our disinfection protocols, coupled with EPA-registered disinfectants and other cleaning products, can treat workspaces against a wide spectrum of bacteria, germs and viruses, and can often be completed in a single day.

Dry Fogging Technology

The HaloFogger® generates a turbulent aerosol using evaporation to ensure the uniform delivery of HaloMist™ throughout complex rooms—even in areas beyond the reach of humans and UV lights. HaloFogger's exceptionally dry aerosol is safe for use around delicate electronics and medical devices.
